1. Metropolitan area median is median family income of the metropolitan area in which the property related to the loan is located.
2. Census tracts are categorized by the median family income for the tract relative to the median income for the metropolitan area in which the tract is located. Categories are defined as follows: *low or moderate*, median family income for census tract less than 80 percent of median family income for metropolitan area; *middle income*, median family income for census tract 80 percent to 119 percent of metropolitan area median; *upper income*, median family income 120 percent or more of metropolitan area median.
